

Please reject the NAB's petition 04-160. There is no reason to restrict content on a service that customers pay for. This product fills a void in many parts of the country where there are not the options and variety of stations that a customer may want to enjoy. In metropolitan areas, it is simply another choice for customers to have. Competition for the traditional broadcasters is healthy just like competition is healthy in every other industry. Maybe companies like Sirius and XM will force the radio industry to improve across the board.
